# SMELTER FOR

Movement Is on Foot to Erect a Plant of Immense Capacity.

PENING VEIN ON 500 LEVEL OF

DALY-JUDGE.

hat purpose in view is not one of sudlen and ill-advised determination. It
s the result of a full knowledge of
onditions in the district and a keen
appreciation of the needs of just such
an enterprise. Discussing the proposilon yesterday, one of the principal
perators in the camps of Stockton and
ophir said:

"We have done," said he, "what we
feel will be for the best interests
of the shareholders. If any of them
think otherwise I feel sure they would

on will have been permanently drained y the big Hon tunnel and with s completion at wast a dozen mines ill be in shape to send out a large onnage of ore, without counting the Honerine in this estimate. The latter will be producing enough ore on its lown account to supply a smelter of 500 cons capacity, while its neighbors who I benefit from the driving of the

supply as much more.
"I am not advised as to how Senator lark and other operators in Ophir lew the smelter question, but it ap-ears to me that they, also, will be axious to see the scheme carried out, sthere is no doubt that the ores from he mines there could be reduced to ullion at a much less cost than they ould be handled for at the custom tants in this valley. The same would true of Dry canyon and Tinitic, also, or that matter, as the haul from the utter camp, with the completion of the Short Line cut-off, would be only bout one-half as long as it is to the melters on this side of the zange.

"In addition to the camps named, the hugway district will be made tributary to the new road and I feel confident that either this Short Line cut-off or ne Salt Lake & Los Angeles will build to that camp and possibly on to ous to see the scheme carried out,

to that camp and possibly on to ep Creek, as well. With all these districts to draw from

and the monster tonnage of the various classes of ore that will be needed to pport a great smelter enterprise, upled with the natural advantages hat the region about Stockton offers, feel absolutely safe in saying that the scheme will take definite form bere the winter is over. Whether it ill come out with a separate commation of capital or whether the theme will be put into form by the ly to predict, but that it will be ried out by one combination or the ther you can set down as a foregone

### DALY-JUDGE DEVELOPMENT.

Opening Old Drift to North Vein On 500 Level Caused Strike Story.

A report was in circulation yester y that an important strike had been de on the 500-foot level of the Daly-Judge property at Park City. Inquiry at the company's offices failed to bring a confirmation of the report. Secretary Lambourne said he presumed the report had its origin in the fact that an old drift, run by the Anchor company to a connection with the main or what is designated as the north ledge in the property, was being cleaned out and put in shape for the further exploration of the vein.

Ore is exposed there and it is expected that portion of the mine will be-come very productive, though things are not yet in shape to begin mining at that point. Like many other porions of the mine, the point in ques n was reached by the old Anchor nagement, but for some unexplained reason it was never mined. The drift was found to be in bad shape and considerable work has been necessary will be only a few days, however, till the extraction of ore from the point

In a day or two he will go out to camp and note the progress that has been made in opening the old bonanza dur-ing his absence. That many welcome surprises are in store for him there is

### TINTIC ORE SHIPMENTS.

During the Week 110 Carloads Were Sent to Market.

Eureka, Sept. 26.—The Eagle & Blue Bell commenced loading ore from the low grade dump on the 29th and has sent out 452 tons and will continue to load about three carloads a day, The Eureka Hill comes forward again with an eight-carload lot of silverhead ore and the Centennial-Eureka shows an increase over last week. The Grand Central, at Mammoth, has also increased its output and the Mammoth mine sends out nine carloads from its gold stope, besides two carloads of concentrates and a bar of gold bullion from the mill. Ship neats for the from the mill. Ship nents for the week consist of 110 carloads of ore, two carloads of concentrates and one har

AT THE UNCLE SAM.

R. G. Legg Takes Charge-Looking

Into Mill Matter.

R. G. Legg, the new superintendent of the Uncle Sam Consolidated, left for camp last night to take formal charge of the mine and personally di-rect operations. Ma.ager Chipman during the afternoon stated that pre-vious to his trip into Wyoming several days ago Mr. Legg had made an inspection of the property and then agreed to accept the superintendency. Some changes in the method of work were then suggested by him and dur-ing his absence they had started to carry them into effect. One of these changes related to the development of the new gold quartz ore body—one that vill make the extraction of the ore attempt will be made to mine it. During his stay at camp Superin-tendent Legg will also look into the

proposed leasing of the Tesora mill, ly depend the action of the company

taking hold of it.
The mine, Mr. Chipman says, is givthe mine, Mr. Chipman says, is giving a pretty good account of itself
these days, and quite a respectable
tonnage of good shipping ore is being
extracted and sent to market. Five
more carloads reached the sampler yesterday and another consignment of like
proportions is being rapidly accumulated at the mine.

### LA REINE CLOSES DOWN.

1. VILL BE BUILT NEXT YEAR After a Long Trial to Open a Mine Management Gives Up.

After years of labor and the expendi-ture of more than \$100,000 in a fruit-less search for ore that was never found within the limits of its territory; after driving over 5,000 feet of tunnels, shafts, cross-cuts and drifts, and becoming thoroughly convinced ROM whisperings that are now heard in certain quarters and from the trend of events that have seen maturing for many months, it is afe to say that before this time next rear a big smelter will be under contruction at the camp of Stockton, over in Tooele county. The movement with hat purpose in view is not one of sud-

experience no difficulty in obtaining a lease on the property if they wanted to further develop it. It is an un-fortunate state of affairs, I admit, but there seems to be nothing else to do.'

### BONDING TONOPAH MINES.

What Judge Sherman and Others Are

Doing at the Pactolus. Judge Sherman, associated with other parties from Salt Lake, has bonded all of the claims of Pactolus, situated on the porphyry belt outside of the original group, with the ex-ception of the claims owned by Messrs. Logan, Humphreys, Peters and Thorn. It is understood that the Salt Lakers

camp.

### Bingham Mines Foreclosed.

A decree of foreclosure was granted by Judge Hall yesterday in favor of the plaintiff in the case of Joseph Nelson against the Illinois Mining com-pany and the Copper Glance Mining & Milling company, foreclosing the de-fendants' interest in and to the Hogg, Illinois Chief and other mining claims in the West Mountain mining district. The amount of the judgment is \$12,500, with interest and attorney's fees.

Ore and builion settlements in this city vesterday, as reported by McCornick & Co.. amounted to \$77,600, as follows: Sil-ver, lead, gold and copper ores, \$40,600; base builion, \$37,000.

Ore and Bullion.

The day's trading closed on the fol-owing record of final quotations and

## STOCK MARKET A LITTLE BETTER

Movement to Advance the Lowpriced Industrials.

MONEY CONTINUES SCARCE

SHAW'S BOND OFFER WILL NOT MEND MATTERS.

New York, Sept. 26.—There was a show of considerable strength in the stock market today. The principal movement was in St. Paul and Louisville & Nashville, and the extreme advance of 5% in the latter and 3% in the former had considerable sympathetic effect on the railroad list generally. There was a brisk buying of Reading, nominally based on the supposition that the end of the coal strike is near. Manhattan was largely bought by the speculative interests, which have been accumulating the stock for some time. There was a notable disposition to advance on the part of a number of minor low priced industrials, especially the railway equipment companies.

a number of minor low priced industrials, especially the railway equipment companies.

During the final hour the professional operators, whose buying had advanced prices, took their profits very generally with the result that final prices for a number of leading stocks are from one to two points lower than the best. The special ground for the movement in St. Paul was the publication of a report that important stock subscription privileges are to accrue shortly. Louisville & Nashville was helped by the color of authority given to a report that the control of the system is to be lodged with the Atlantic Coast line. This would satisfactorily solve the problem that has much puzzled. Wall street ever since the control of the road was snatched from its long-time holders as an incident in a speculative campaign. Money rates continued high today, but a supply was available and the feeling was engendered that the banks will make a strong showing in the statement tomorrow. The money lent in the market was said to come from the trust companies, and influential bank officials disclaimed any leading in the stock market on the part of the banks. Secretary Shaw's supplementary offer to purchase government 5 per cents at 166 had a lavorable sentiment upon the market. Like the offer to anticipate government interest for the fiscal year, it is felt in Wall street that the effect of this measure will be sentimental rather than practical. Previous to today the last sale price for the 5s was 104, but the ruling quutation is 165% bid and 106% asked, and there were sales on the exchange at 106% after the treasury department offer was promulgated. Bond dealers are emphatic in the opinion that the secretary's price will bring out no important offerings of the bonds.

The preliminary figures of the week's movement of money indicates that the ruling promulation of the bonds.

price will bring out no important offerings of the bonds.

The preliminary figures of the week's movement of money indicates that the banks have lost over \$4.00,600 during the week, including payments by the subtreasury and the assay office on account of gold deposited at Pacific coast and on account of the \$1.00,000 in gold bars which arrived from Europe. Considered in connection with last week's deficit in reserves of over \$1.800,000 it will be perceived that a very extensive reduction of loans and deposit liabilities must have taken place in order to bring the bank reserves up to the legal limit again. Speculators today professed great confidence, however, that a considerable surphis would be revealed by tomorrow's bank statement. An incident of the day was the rather firmer tone for sterling exchange in connection with the lessened stringency in the money market.

The bond market was firm in tone. Total sales, \$3.740,000. United States old is coupon declined '& per cent on the last call.

E. W. Madsen and E. M. West left for Park Valley last night to inspect the Century mine. They expect to return Monday.

Everything points to an exodus of mining operators, brokers and investors to Park City tomorrow with the Rio Grande excursion.

Manager H. S. Joseph of the Galena property at Fish Springs will go out to camp to size up conditions at that smart little producer.

Business requiring his attention on this end of the line dispatched, Manager John Rhodin of the Thunderer returns to Park City this morning.

The Taylor & Brunton sampler was yesterday in receipt of ten cars of ore from Tintic, four from Bingham, two from Tonopah and one from Alta.

C. D. Rooklidge is down from Alta with a car of ore from the Oxford and Geneva mines. He reports that the first snow of the season fell in the mountain tops about Alta Sunday last.

A New York dispatch says: Public announcement was made here today of the purchase of the Congress gold properties of Congress, Ariz., by the Development Company of America. The consideration was not announced.

David J. Kelly, superintendent of the Sunshine company's mill, came in yesterday with another consignment of cyanides valued at about \$5.000. He says the mill is now treating about 20 tons of ore per day, while the mine is developing new ore bodies all the time.

GRAIN AND PROVISIONS.

Chicago, Sept. 25.—During the early part of the day wheat was duli and weak, influenced by disappointing cables and heavy receipts in the northwest. Later in the session prominent commission houses turned active buyers, over haif a million bushels of December stuff being taken. This brought about a rally and started shorts to covering. There was also considerable covering by the latter, which advanced sharply. September opened 1/2 to 1/2 higher at 341/4 to 35. After selling down to 84, this option advanced steadily to 87 and the close was 1/2 higher at 36. December opened 1/2 lower at 36. December and disposed of over haif a million bushels of December grain. Shorts covered freely. December closed with a gain of 3/2 at 46%-366%.

Wet weather, good cash balance and light receipts all combined to hold oats steady. December closed 1/2 lower, lard 5c lower at 213/4.

Lower prices ruled in provisions and trading was only moderately active. January pork closed 10c lower, lard 5c lower and ribs 25/2 lower.

The leading futures ranged as follows:

Wheat—No. 2: GRAIN AND PROVISIONS.

C., in October, and those who desire to make a sight seeing trip to the national capital should write John T. Hull, district agent, No. 819 Seventeenth street, Denver, Colo., Vandalia-Pennsylvania lines, regarding low fares, ston-over, rivisional contemplation of the co regarding low fares, stop-over privi-leges, side trips, etc. Home visitors' excursion tickets to Indiana and Ohio points will be sold at the same time.

SALT LAKE HIGH SCHOOL

Vs. Ogden High School. Excursion via Oregon Short Line Saturday, Sept. 27. Round trip \$1.00. Special train at 9:15 a. m. Opening of Gootball season.

Manufacturing Plants Are Nearly

the treasury, which is partly respon-sible through absorption of funds. In-jury to crops by frost has no more than offset the increased acreage, while high prices fully compensate produc-ers. It is not a time for pessimism, although securities have declined sharply. Railway earnings for Sep-tember thus far exceed last year's by 6.8 per cent, and those of 1900 by 16.5 per cent. Pressure in the iron and steel industry has been somewhat alleviated by larger receipts of coke and liberal imports of pig iron, yet the outlet is by no means devoid of un-favorable features.

In an efffort to provide adequate

transportation facilities the railways are purchasing liberally of rolling stock and other equipments, and great im-provements in terminal methods are

A further slight advance in footwear quotations indicates that the healthy demand has made it possible for manufacturers to secure compensation for the recent sharp rise in materials. No concessions are possible in the wool market, which has decreased in activity at the east.
Failures for the week numbered 207
in the United States, against 227 last
year, and 32 in Canada, against 34 a year ago.

Bradstreet's Report.

Bradstreet's tomorrow will say: Large yields of nearly all crops have been secured, jobbing trade activity is unabated, manufacturing industry in nearly all lines is running at full speed, retail demand is improving, railway and water transportation interests are pushed to handle business offered, and the only unfavorable feature in the situation is the growing tension exerted by the anthracite coal strike, which now finds cold weather almost here and industries in many lines threatened with interference caused by the enhanced price of the bituminous product.

the enhanced price of the bituminous product.

| Rec. | Ship. | Western jobbing trade reports are almost surprisingly good, despite the advanced stage of the season and the activity previously noted.

| Tight money is credited with some effect in checking the upward march of leather, owing to the small margin of profit in the business generally. Among the industrials, the feature of trancendent interest is still the
